

Extended-life Surface Protection for your overhead conveyor system

Prolong the life of your overhead conveyor chain with MandM's new Extended-life Surface Protection metal treatment for overhead conveyors. The E.S.P. coating impedes rust and corrosion that is normally seen on conventional conveyors utilizing standard yellow dichromate plating. Rigorous testing of this product has already proven successful for other industries. When coupled with the PCL-1000 lubricator the E.S.P. metal treatment is the perfect compliment for the

M&M Poultry Overhead Conveying System, and has been proven to double the life of existing 348 conveyor chains.

ESP

- Resistant to caustic chemicals.*
- Impedes corrosion and rust.
- Increases the surface hardness for extended wearability.
- Does not change the core metal hardness, so the metal will not be brittle and break.
- Tested at over 300 hours of salt spray, 50% longer than the industry standard yellow dichromate plating.
